

Lindsworth School

We have been awarded the Gold Reading Award!

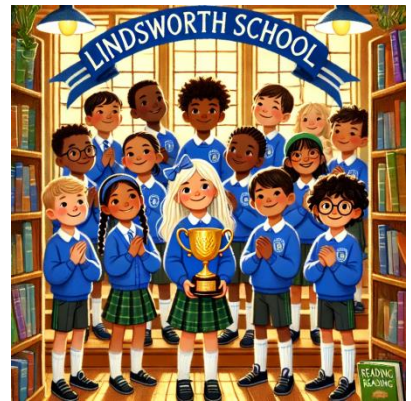

We are delighted to share that Lindsworth School has been awarded the prestigious Gold Reading Award by One Education. This significant achievement recognises our commitment to excellent provision in reading, with quality embedded across every part of our curriculum.

The One Education Reading Award is a unique Reading Quality Mark that supports schools in developing their entire reading curriculum. Achieving the Gold level is a tremendous honour that underscores our dedication to providing a robust and inspiring reading programme for all our students.

This award highlights that our school offers a strong reading curriculum – something we know is essential for a successful secondary education. By nurturing our students' reading skills, both for practical purposes and for sheer enjoyment, we strive to equip them with the best foundation for success at school and beyond.

The Gold Award recognises our excellence in three core areas of reading:

- **Reading for Fluency:** working hard to ensuring students read confidently and accurately, with ease and flow.
- **Reading for Meaning:** developing students' ability to comprehend, analyse, and think critically about what they read.
- **Reading for Enjoyment:** cultivating a love of reading that students that they can carry with them throughout their lives.

This award is a testament to the hard work of our staff and students and to the support we receive from our stakeholders. Reading remains at the heart of education, influencing not only academic performance but all aspects of life. When children develop strong reading skills, they gain the ability to learn, understand the world around them, and communicate effectively.

At Lindsworth School, we are deeply committed to improving the reading skills of all our students and helping each one discover the lifelong benefits and joy that reading can bring. Thank you for your continued support in encouraging reading at home – together, we can inspire a new generation of readers.
